AI Web Development Internship

Website Analyzed

InAmigos Foundation Official Website

<https://inamigosfoundation.org.in>

Date of Submission

23 July 2026

Objective: To develop an understanding of website analysis and improve user experience thinking by analyzing the foundation's website and proposing effective enhancements for a better user experience.

1.Home Page Analysis

Overall Impression

The homepage presents the foundation's mission in a clean and organized manner. It includes all the essential sections such as a hero banner, About Us, Causes, Volunteers, Events, Gallery, and Footer. The website uses a consistent green and white color theme that matches the NGO's identity.

Strengths

- Clean and simple navigation bar.
- Relevant images that reflect the foundation's work.
- Consistent branding and color scheme.
- Well-structured homepage sections.
- Contact information is easily accessible.

1. Hero Section

Current Observation

- Large banner image with the heading **"Soaring Towards a Brighter Future."**
- Three cards for **Donate Us, Become a Volunteer, Join Us.**

Areas for Improvement

- Add a clear **"Donate Now"** button directly on the banner.
- Increase the contrast between the text and the background image for better readability.
- Reduce the large empty white space below the banner.

- Add a short mission statement explaining the foundation's purpose.

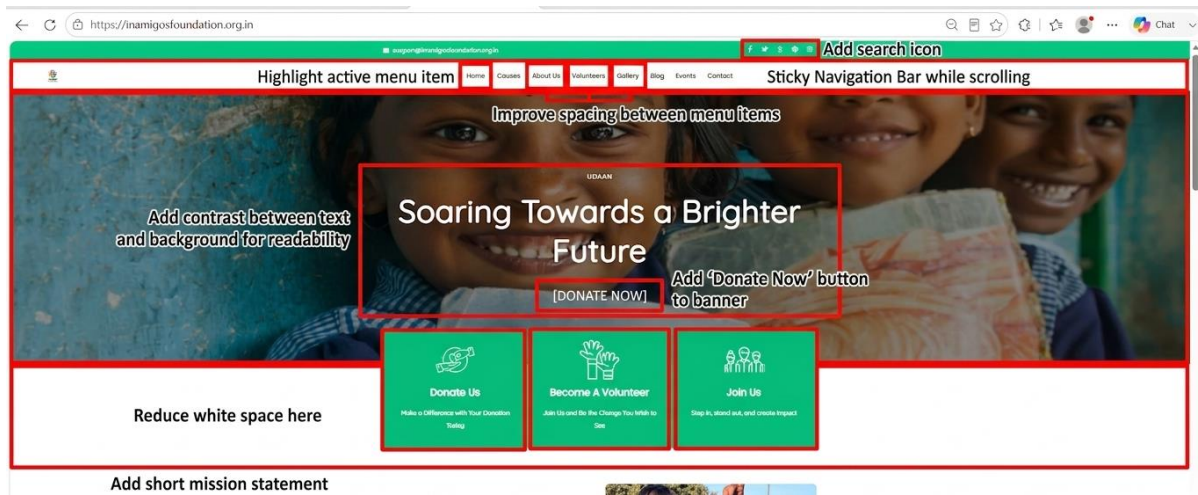

2. Navigation Bar

Current Observation

Navigation is simple and easy to understand.

Areas for Improvement

- Make the navigation bar **sticky** while scrolling.
- Highlight the active menu item more clearly.
- Add a search icon.
- Improve spacing between menu items.

2. Causes Page Analysis

Overview

The **Causes** page is intended to showcase the foundation's ongoing fundraising campaigns and social initiatives. However, during the analysis, the page displayed a **"No Results"** message, which may create the impression that there are no active causes or campaigns available.

Strengths

- Simple and clean page layout.

- Easy to access from the main navigation menu.
- Dedicated section for displaying charitable causes and fundraising initiatives.

Areas for Improvement

1. Display Active Causes

Instead of showing "No Results", display the foundation's ongoing initiatives such as **SEVA**, **BACHPANSHALA**, **JEEV**, **UDAAN**, **PRAKRITI**, and **VIKAS**, along with a brief description of each project.

2. Add Fundraising Progress

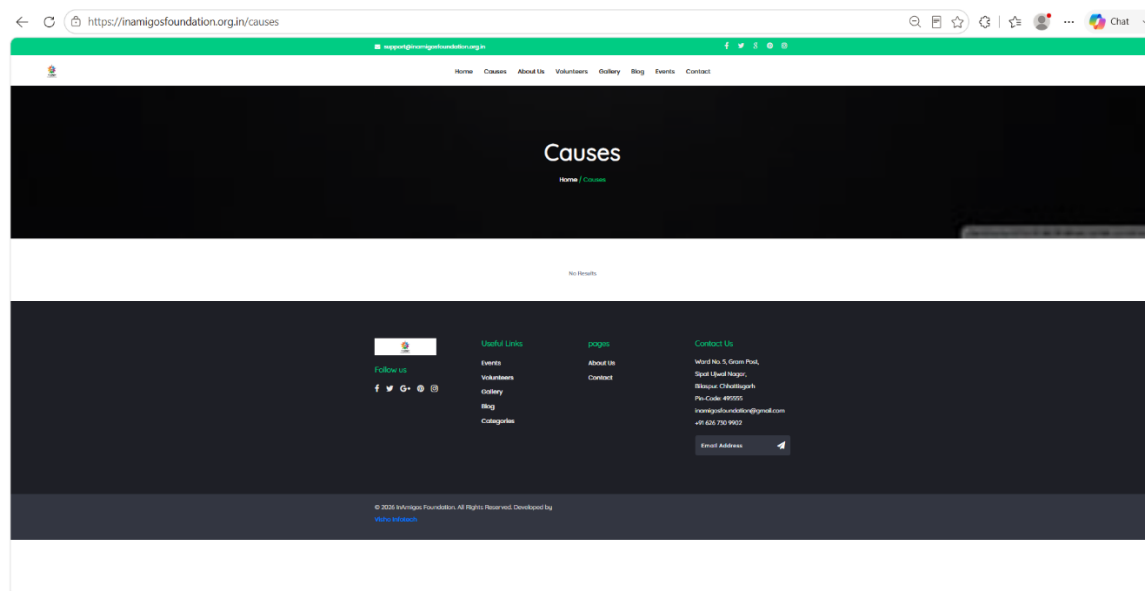

Include a progress bar showing the amount raised versus the fundraising goal. This increases transparency and motivates visitors to contribute.

3. Improve User Experience

If there are currently no active campaigns, replace the "No Results" message with a more informative message, such as:

"There are currently no active fundraising campaigns. Please check back soon or explore our ongoing community projects."

This provides a better user experience and prevents confusion.

3. About Us Page Suggestions

Overview

The **About Us** page effectively introduces the InAmigos Foundation, its mission, credentials, and key initiatives. The information is accurate and informative; however, the page is text-heavy and could benefit from improved visual presentation and user engagement.

Suggestions for Improvement

1. Improve Visual Appeal

- Add images of volunteers, community events, and beneficiaries alongside the content.
- Include icons for certifications, mission, and initiatives to make the page more attractive.

2. Enhance Content Organization

- Divide the information into separate sections such as **Mission, Vision, Our Story, Certifications, and Key Initiatives**.
- Use cards or panels instead of long text blocks to improve readability.

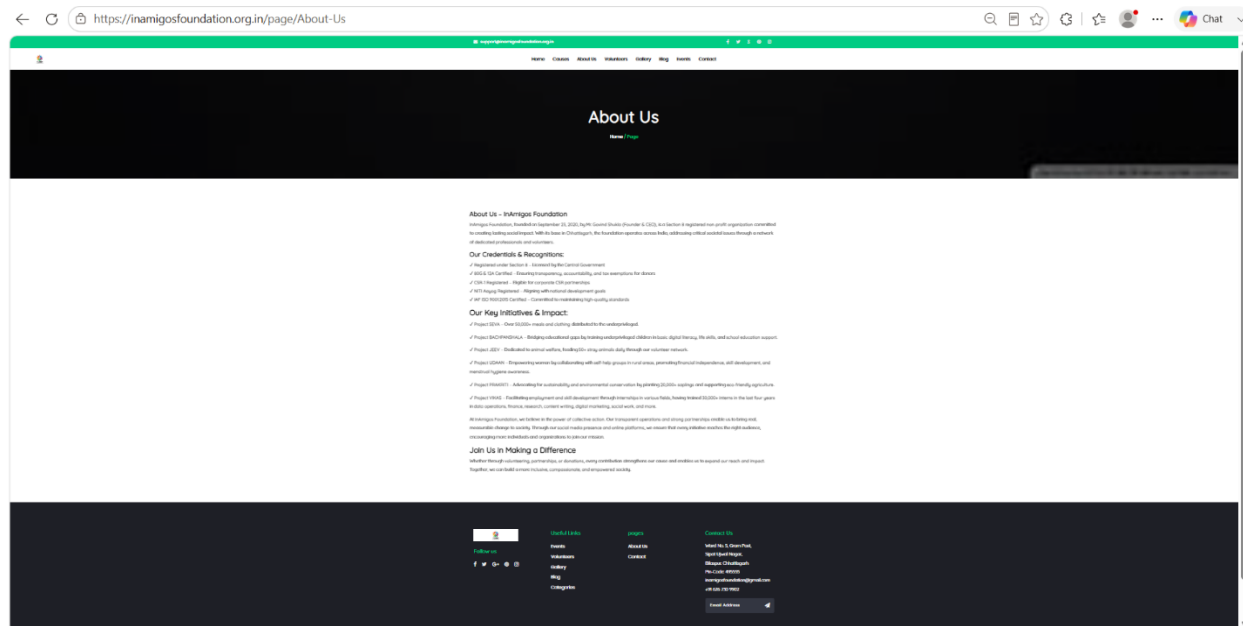

3. Improve Readability

- Increase font size for body text.
- Add more spacing between headings and paragraphs.
- Use bullet points consistently for better scanning.

4. Add Testimonials

Include testimonials from volunteers, donors, or beneficiaries to strengthen the foundation's credibility and demonstrate real-world impact.

Implementing these improvements would make the **About Us** page more engaging, visually appealing, and easier to navigate.

4. Volunteers Page Analysis

Overview

The **Volunteers** page introduces the core members of the InAmigos Foundation by displaying their photographs, names, and positions. The page has a clean layout and helps visitors recognize the people behind the organization. However, it can be further enhanced by providing more detailed information about the volunteers and encouraging visitor participation.

Strengths

- Clean and organized grid layout.
- Displays volunteer photographs, names, and designations.
- Consistent design that aligns with the overall website theme.
- Easy to navigate from the main menu.

Suggestions for Improvement

1. Provide Volunteer Role Descriptions

Add a brief description below each volunteer profile explaining their responsibilities and contributions to the organization's activities.

2. Recognize Volunteer Contributions

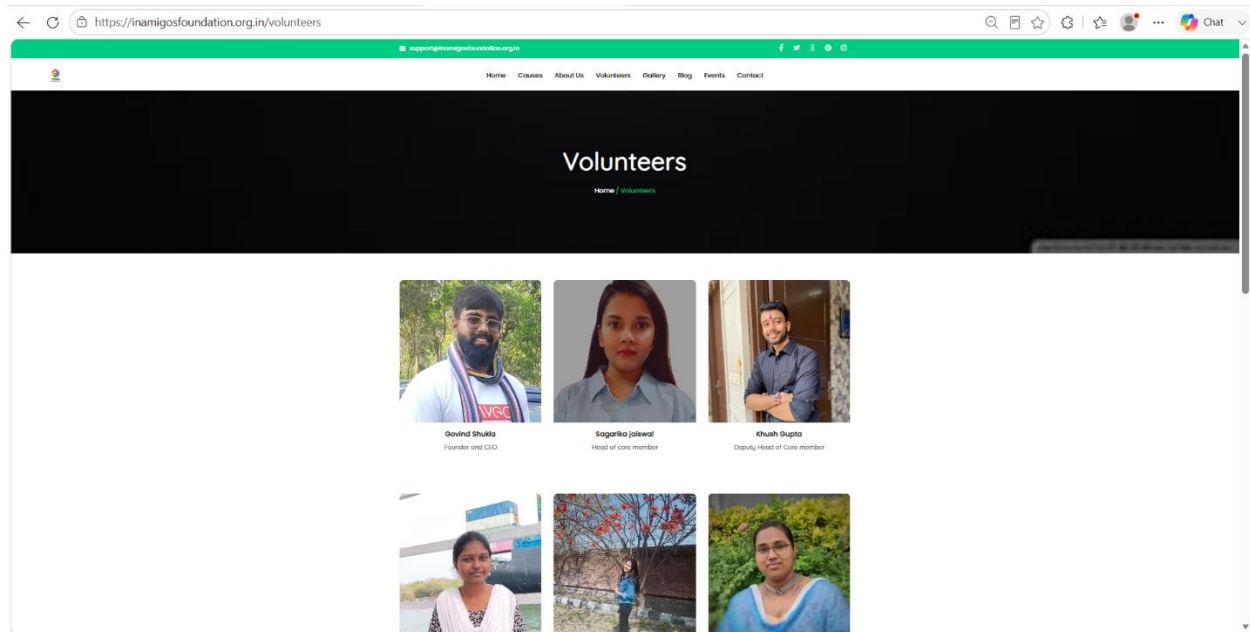

Highlight outstanding volunteers through certificates, awards, or "Volunteer of the Month" features to appreciate their efforts and inspire others.

3. Add Interactive Call-to-Action Buttons

Include buttons such as **Join Our Team**, **Apply to Volunteer**, or **Contact Us** to encourage visitor participation.

4. Ensure Responsive Design

Optimize image sizes, text alignment, and spacing so that volunteer profiles display properly across desktops, tablets, and mobile devices.

5. Gallery Page Analysis

Overview

The Gallery page showcases photographs of InAmigos Foundation's activities, events, and community initiatives. It provides visitors with a visual representation of the organization's work, helping build trust and demonstrate its impact across various social causes.

Strengths

- Displays real photographs from NGO events and community outreach programs.

- Clean and simple grid layout that is easy to browse.
- High-quality images effectively showcase the foundation's activities.
- Consistent design with the overall website theme and navigation.

Suggestions for improvements

1. Add Image Categories and Filters

Organize images into categories such as *Education*, *Environment*, *Women Empowerment*, *Animal Welfare*, and *Community Service* to help visitors quickly locate specific project photos.

2. Include Captions and Event Details

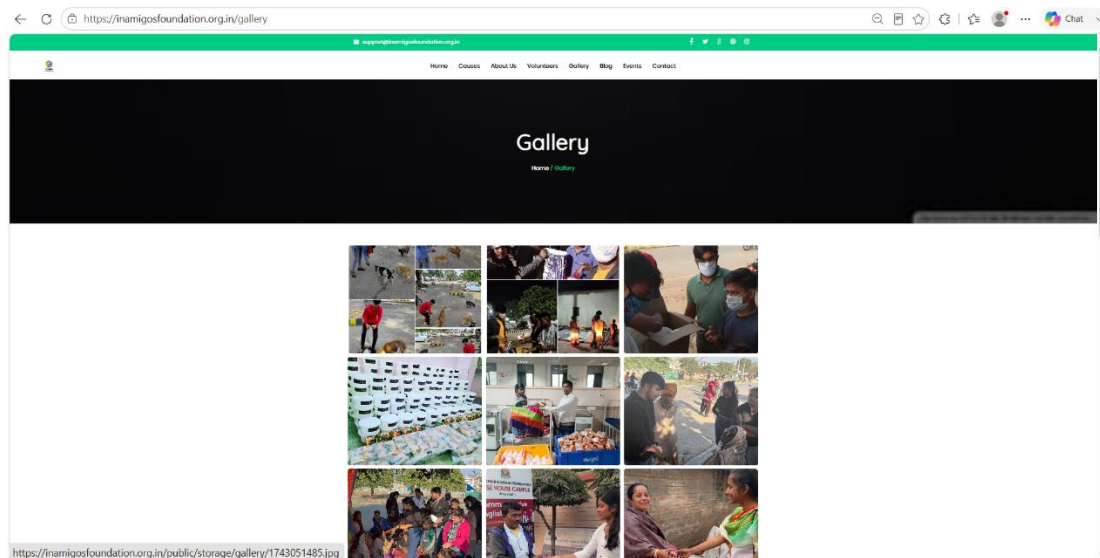

Add a brief caption, event name, date, and location for each image to provide context and highlight the purpose of each activity.

3. Add a Search Function

Include a search feature that allows users to find gallery images based on project names, events, or keywords, improving navigation as the gallery grows.

4. Highlight Featured Impact Stories

Feature selected images with short success stories or project outcomes to better communicate the foundation's achievements and social impact.

6. Blog Page Analysis

Overview

The Blog page shares articles related to the foundation's projects, social initiatives, awareness campaigns, and community development. It helps keep visitors informed about the organization's activities while promoting education and engagement.

Strengths

- Well-organized blog cards with featured images and article summaries.
- Categories and recent posts are displayed for easy navigation.
- Each article includes publication date, category, and social sharing options.
- Consistent layout and design that matches the rest of the website.

Recommendations

1. Add a Search Bar for Blog Posts

Include a search feature so visitors can quickly find articles by title, topic, or keyword.

2. Display Estimated Reading Time

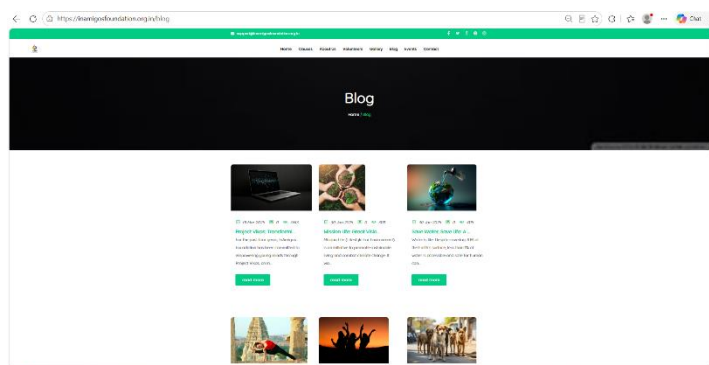

Show the approximate reading time (e.g., "5-minute read") for each article to help users choose content more easily.

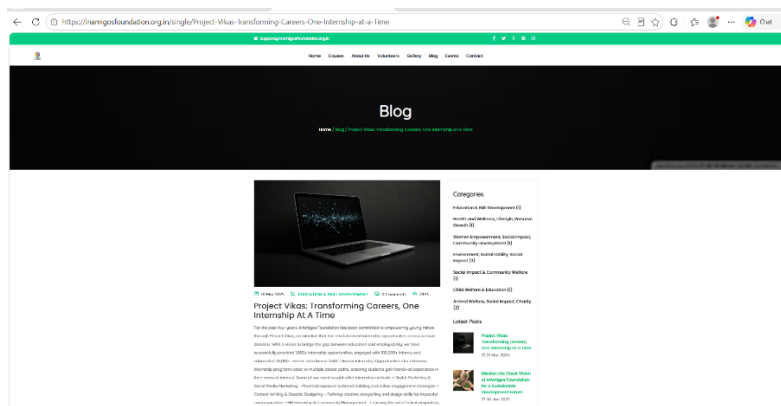

3. Include Related Articles Section

Display similar or recommended posts at the end of each blog article to encourage users to continue exploring the website.

4. Enable Newsletter Subscription

Add a "Subscribe to Our Newsletter" option so visitors can receive updates whenever new blog posts or NGO activities are published.

7.Event Details Page Analysis

Overview

The Event Details page provides comprehensive information about individual events, including the event description, highlights, date and time, location, organizer details, category, and social sharing options. The layout is clean and easy to navigate, allowing visitors to quickly understand the purpose and schedule of each event.

Strengths

- Provides complete event information in a well-structured format.
- Displays important details such as event schedule, location, and organizer contact.
- Event highlights help visitors understand the objectives and activities.
- Social media sharing buttons increase event visibility and outreach.

Suggestions for Improvement

1. Add a Registration or RSVP Button

Include a prominent **"Register Now"** or **"RSVP"** button so interested visitors can easily participate in the event without searching for registration information elsewhere.

2. Display Event Status

Show a status badge such as **Upcoming**, **Ongoing**, or **Completed** near the event title. This helps users immediately identify the current status of the event.

3. Add an Event Calendar Integration

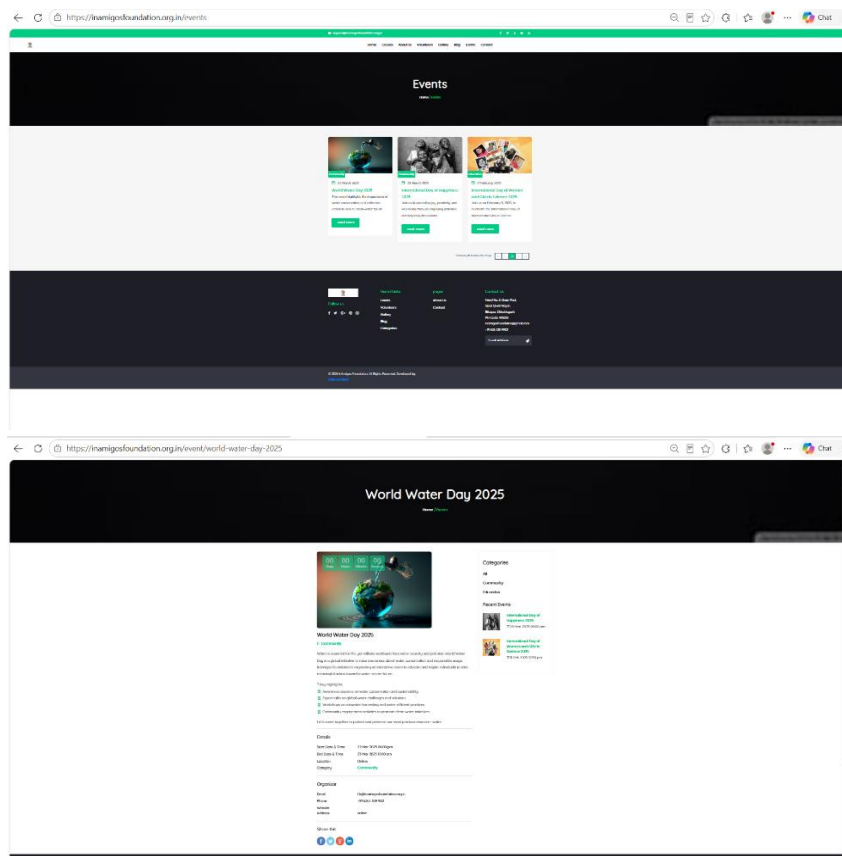

Provide options like **"Add to Google Calendar"** or **"Download Calendar (.ics)"** so users can save the event reminder directly to their personal calendars.

4. Include Speaker or Organizer Profiles

Display brief profiles or photos of the event organizers or guest speakers to build credibility and provide additional context about the event.

5. Display Related Upcoming Events

Add a **"Related Events"** or **"Upcoming Events"** section at the bottom of the page to encourage visitors to explore and participate in more activities organized by the foundation.

Conclusion

The **InAmigos Foundation** website provides a well-organized platform that effectively showcases the organization's mission, causes, projects, volunteers, events, blogs, and community initiatives. The website features a clean layout, intuitive navigation, responsive design, and informative content, making it easy for visitors to learn about the foundation and its social impact.

While the website performs well in terms of structure and usability, several enhancements could further improve the overall user experience. Adding advanced search and filtering options, stronger call-to-action buttons, interactive features, improved content organization, enhanced accessibility, and additional engagement tools would make the website more informative, user-friendly, and impactful.

Overall, the website successfully fulfills its purpose of promoting the foundation's initiatives and connecting with its audience. With a few usability and engagement improvements, it has the potential to provide an even more effective digital experience for donors, volunteers, beneficiaries, and the wider community.
